

Medical IT – safe and solid.

Medical hardware for highest demands

Hardware that you can rely on!

MEDX Mini PC-Module – a reliable hardware component for clinical information technology.
Baaske Medical MEDX Thin Client.

MEDX PC-Module Thin Client:

Convincing reliable features and clever components

- ✓ **Compact:** Space-saving integration into the MEDX power strip, also for retrofitting.
- ✓ **Universal:** The MEDX PC-Module Thin Client can be universally mounted in almost any environment.
- ✓ **Fanless:** Dust or contamination is not spreaded into the patient environment.
- ✓ **Robust and protected:** Shock- and scratch-resistant housing made of anodised aluminium and protected against dust and liquids, it makes

MEDX PC-Module Thin Client ideally suited for robust use under difficult conditions, e.g. in intensive or emergency care.

Hygienic: Smooth, wipe-disinfectable surfaces

- ✓ ensure quick and complete cleaning.

- ✓ **Operating system compatible:** Hardware compatible with IGEL OS, Windows and Openthinclient.

open  thinclient®

MEDX PC-Module is compatible with IGEL OS, Open-thinclient and Windows, has an integrated Intel® Celeron® N3350 processor, 2 GB RAM memory and a 32 GB onboard eMMC. For maximum connectivity MEDX Thin Client is also equipped with 3 USB ports (3.2), an HDMI output, a LAN interface and optional Bluetooth. Hardware components such as monitors, keyboards, displays, touchscreens, speakers, headphones, mice, etc. can therefore be connected with ease. Thin client dimensions with two modules: 320 x 80 x 79 mm (W x H x D).

An unbeatably safe combination

- ✓ The PC module is perfectly integrated into the MEDX ZPA power strip
- ✓ Many combination options
- ✓ Absolutely durable
- ✓ Reliable hardware that saves time and therefore money

Safe. Fast. Fanless.

e-medictm Silence XS-M
Item no. 2012396

e-medictm Silence ST-M
Item no. 2012218

Do you value performance, reliability, ease of use and hygiene? Do you want to protect patients and staff in the best possible way and still receive the highest possible performance? Then the medical e-medictm computer systems are your first choice – perfect for use in laboratories, hospitals, doctors' surgeries, medical centres or clinical facilities, as well as in medical devices. e-medictm PCs are very easy to clean and disinfect and, thanks to the high-quality industrial components, are extremely robust and durable.

We define highest qualitative and hygienic requirements on our Baaske keyboards and mice, because they are used in sensitive areas such as operating theatres and keyboards and mice in the clinical use are often operated by different people at the same time. The surfaces of our input devices are completely sealed, easy to

clean and can be treated with all material-compatible (surface) disinfectants. Some keyboard variants are available with backlighting – for professional performance even in difficult lighting conditions. Country-specific layouts are available on request.

Effective protection for users and keyboard.

Almost universal e-medic™ protectors are suitable for all common keyboards, laptops or remote controls. The hygienic film can be slipped over the respective device in just a few steps and effectively protects it against soiling and the spread of germs and bacteria. Ideal for hospitals, doctors' surgeries and laboratories that like to protect their standard equipment hygienically. e-medic™ protectors also contribute to better infection control in offices, production areas, warehouses and wherever equipment is may contaminated by dust or oil-smeared hands. The wipeable films reliably prevent the penetration of dirt, dust and accidentally

spilled liquids. High quality material not only protects people from dangerous germs, it is also good protection against abrasion, so that printed keys remain legible for longer.

Advantages:

- ✓ Reliable protection against bacteria, viruses and fungi
- ✓ Prevents penetration of dirt and liquids into the keyboard
- ✓ Protects against abrasion
- ✓ Easy handling, easy to replace

3. Ready!

Tough-PAC®: More than just a robust case for your iPad.

Tough-PAC® is a specially designed hard-shell case for iPads from 10.2 to 10.9" (inch).

Tablet PCs such as the iPad have also become an integral part of everyday medical life: the rapid availability of important information thanks to the connection to the Internet and network is indispensable, especially for doctors and medical professionals. However, the practice and hospital sector places special demands on the handling of iPads, laptops and the like. Conventional covers, sleeves, cases and protective sleeves made of plastic, silicone, leather, TPU or even wool felt are highly unsuitable here. With the robust Tough-PAC® iPad case from Baaske Medical, however, your iPad is perfectly equipped and protected for any use - and you benefit from numerous product features.

Item no. 2013005

2 | Baaske Tough-PAC® charging station USB-C

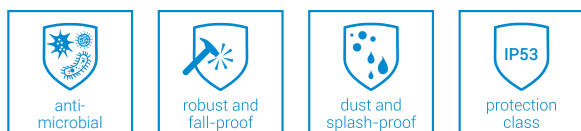

Item no. 2013047

3 | Baaske Tough-PAC® Multiload

Item no. 2012266

Let us convince you of the **advantages** of our **Tough-PAC®**:

- ✓ Robust iPad case
- ✓ iPad case in medical grade quality
- ✓ Ergonomic carrying handle for use with gloves
- ✓ Protection against shocks, dust and liquids (IP 53)
- ✓ Optional replaceable display protection with tempered glass
- ✓ Access to all settings and functions
- ✓ Charging cradle and Multiload available for convenient and wireless charging and synchronisation
- ✓ Camera protection on the front and back
- ✓ Kein Verlust der WiFi-, 3G- oder Bluetooth-Konnektivität No loss of WiFi, 3G or Bluetooth connectivity
- ✓ Convenient cleaning with antimicrobial wipes or sprays

Let's play IT safe.

Baaske stands for secure, standards-compliant, medical computer hardware. This applies individual components and customised solutions. Baaske IT solutions have been approved in practice and are used in medical devices in the patient environment, in doctors' surgeries and hospitals and everywhere where safety, durability and hygiene are important.

Our product portfolio includes desktop PCs, all-in-one systems, keyboards, mice, keyboard protectors and iPad hard cases developed by us. We master the certification process and offer products, that meet all latest medical standards.

Benefit from our practical experience of more than 17 years. After all, we have been offering and developing solutions for your applications since 2007. Together we find new answers to questions in medical technology and support you in your work in the best possible way.

Our sales team will be happy to assist you by phone or e-mail:
